FINAL REPORT

June 4, 2026

For your final report, as discussed, please submit a report that follows the overall structure of a research paper. There is no strict template or page limit, but a common structure would be:

- A title and your name
- A short abstract (one paragraph)
- Introduction
- Related Work
- Methodology
- Results
- Discussion
- Conclusion
- Acknowledgements
- References

Images and tables should have numbers and captions, as in a research paper (Figure 1, Table 1, etc).

You are advised (but not required) to use LaTeX to write your report. Overall, learning LaTeX would be helpful for your career. The following pages might be useful:

- <https://www.latex-tutorial.com/>
- <http://mirrors.rit.edu/CTAN/info/lshort/english/lshort.pdf>

Point Distribution and Submission

The points (in terms of 100%) will be distributed as follows:

- Quality of the writing and presentation (20%)
- Creativity (20%)
- Implementation quality and effort (30%).
- Experimental evaluation (30%).

Regarding your submission, please submit both your report and your source code. A link to your Github repo is also ok if that is more convenient.
